

Grasslands

for Gamebirds & Songbirds

2020 YEAR IN REVIEW

In its 2nd year, GGS has made great progress in addressing its goals to:

- › Establish habitat for birds and pollinators.
- › Improve soil health and water quality.
- › Improve overall human health.
- › Increase recreational opportunities.

Program Highlights

- \$2 Million for Conservation
- 3 New Grassland Biologists
- 2 New Habitat Teams to Assist Landowners
- Outreach to 2,000,000 Citizens

Pollinators & Wildlife

- 182 GGS Habitat Projects
- 2,581 Acres of Habitat Enhancement, Including Native Grass, Wildflowers, & Shrub Species

Gamebird Hunting

- Increased Hunting Access on Private Lands
- 126 New Hunting Opportunities
- 2,514 Acres Enrolled

Bird Monitoring

- 8 Grassland Bird Species Monitored to Assess Habitat Impacts
- 300 Surveys on 14,500 Acres Completed
- IN's First National Bobwhite Conservation Initiative Focal Area

OUR GOAL

TO DEVELOP OR ENHANCE
3,250 ACRES
OF BENEFICIAL GRASSLAND
HABITAT ON PRIVATE LAND
